Course Descriptions

Cross Connection Specialist Certification: A four day course that will enable participants, upon successful completion, to obtain Oregon State Health Services certification as a Specialist. Topics include backflow incidents, hydraulics of backflow, design and function of backflow assemblies, ordinance writing, regulations, establishing and maintaining a cross connection program, legal liabilities, safety, conducting inspections, customer education, and record keeping.

Cross Connection Specialist Update: A one day course that meets the Oregon Health Services requirements for renewal of Cross Connection Specialist certification. Topics include new regulations, inspection techniques, new manuals and publications, resource information, and Specialist safety.

Backflow Assembly Tester Certification: A five day course that will enable participants, upon successful completion, to obtain Oregon State Health Services certification for testing backflow assemblies. Topics include backflow incidents, hydraulics, backflow assembly design, function and testing procedures, record keeping, assembly repair, and tester safety. The focus of this course is learning and performing test procedures.

Backflow Assembly Tester Recertification: A one day course that meets the Oregon Health Services requirements for renewal of Backflow Assembly Tester certification. Course includes review of assemblies and test procedures, tester safety, new regulations, hands on proficiency testing, and written exam.

Backflow Assembly Repair: A course designed for anyone that repairs backflow assemblies. This is a hands-on training that allows participants to disassemble, repair, assemble, and test assemblies. Course includes BMI's comprehensive repair manual. This definitive field guide covers all aspects of repair, from tool selection to troubleshooting, on all major manufacturers of backflow assemblies.

Confined Space Entry: This one day course provides the understanding, knowledge, and skills necessary for the safe performance of confined-space entry duties that are in compliance with state and federal OSHA regulations. Topics include protection requirements, OSHA regulations, host employer's responsibilities, permit-required spaces, and emergency rescue and retrieval.

⇒ Tuition for all class registrations is transferable but non-refundable

NOTE: A HIGH SCHOOL DIPLOMA OR EQUIVALENT IS REQUIRED IN ORDER TO OBTAIN A TESTER OR SPECIALIST CERTIFICATION IN THE STATE OF OREGON
