

For over 20 years, BMI has been a leader in the drinking water industry. Our instructors have taken their many years of combined experience as water operators, consultants and trainers to bring you thorough and relevant drinking water courses.

COURSE DESCRIPTIONS

Water Distribution Exam Review - 2 days - Prepares students for all levels of water distribution certification exams. Due to small class sizes, we are able to tailor instruction to fit your certification needs. This class includes an extensive OAR review and also covers the following: math & chemistry for water operators; disinfection rules & procedures; basic well construction & development; and water utility management, operations & maintenance principles. Class fee includes our well-known WDM Manual. BMI has taught this class for over 10 years with excellent results.

Water Treatment Operator Exam Review - 2 days - Prepares students for the Water Treatment Plant Operator or Basic Treatment Plant Operator Certification Exam. The review topics include math for treatment plant operators, water sources and treatment coagulation and flocculation, corrosion control, and overview of plant operation and treatment, softening systems and laboratory procedures.

Oregon Administrative Rules Review - ½ day - An in-depth look at the current drinking water-related OAR as it applies to certification exams as well as day to day operations.

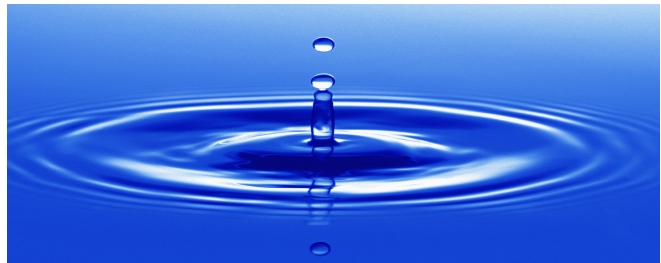

Basic to Advanced Math for Water Operators - ½ day - Begins with a basic math review and moves into formulas commonly used in the industry. This class is designed to prepare attendees for their certification exams.

Managing & Owning a Public Water System - 1 day - Examines the management of a water system from a business perspective with an emphasis on compliance with regulations, liability and rate setting.

What Your Chlorine Residual is Telling You - ½ day - Examines the benefits of using chlorine as a disinfectant and how residual readings can indicate problems within a water system.

Injector Pumps: The Good, The Bad & The Ugly - ½ day - Presents the application and use relative to various types of treatments for both water and wastewater operators. Maintenance and troubleshooting will be presented.

Asbestos Safety for Water Operators - ½ day - Looks at the importance of safe handling of asbestos cement pipe in the distribution system as well as proper disposal, equipment, history and health issues.
